

RESOLUTION
SREC
March 30-31 2012

**Texas Opposition to United Nations Sustainable Development and All Entities
Involved in Implementation of Such Programs**

WHEREAS the Republican Party of Texas acknowledges that we are one State under God and that we stand for equal Liberty and Justice for all, and

WHEREAS the RPT stands in clear and fundamental opposition to all forms of religious, social, economic, and political globalism for the just governing of the people of this free State, and

WHEREAS the Texas Constitution guarantees, by the will and pleasure of our supreme political sovereign, that all citizens of this free State shall have and enjoy their rights to life, liberty and the pursuit of happiness, including their rights to own, control and enjoy private property, and

WHEREAS the people of this great State have no intention or desire to surrender those natural rights given to us by God, being acknowledged by the Whole People as rights to be held inviolate and protected forever under the body of their fundamental laws, all laws contrary declared null and void, "ab initio", and

WHEREAS the RPT as a body representing the several Senatorial Districts of this free State and chosen by the people that elected us in order to conserve both their natural and constitutional rights and liberties in their entirety, without diminution or destruction, and

WHEREAS the RPT strongly opposes every attempt to implement the United Nations Agenda 21 Program which was adopted at the 1992 Earth Summit Conference in order to promote a comprehensive program of Sustainable Development projects, Globally, Nationally, Regionally, and locally (Local Agenda 21), extending to every county of the United States. The sustainable development programs are being implemented in every State including our State through the International Council for Local Environmental Initiatives (ICLEI), and assisted by some but not all NGO's (non-governmental organizations) and C.O.G.S. (Council of Governments)

WHEREAS President Clinton in 1993 did establish by executive order a President's Council on Sustainable Development to advance Agenda 21 in this free land, in direct violation of the United States Constitution, without the knowledge or consent of the people of the United States, and

WHEREAS the stated purpose of Agenda 21 and its comprehensive program of Sustainable Development is to abrogate and overthrow the natural individual rights and liberties of the people of this State and to remove the currently existing constitutional guarantees enjoyed by every citizen of this State under our current forms of justice and government, in order to arbitrarily institute a new order of bondage and injustice by erecting an unlimited tyranny and a lawless despotism in place of our existing freedoms, and

WHEREAS other States are already aware of this dangerous assault on our way of life in this Nation and have begun to resist this extra-constitutional cabal in our midst by striking at the head of this globalist monster, such as the people from the great State of Virginia who are working with Attorney General Ken Cuccinelli in concert with the Virginia Legislature to move a bill that will end mandatory comprehensive development plans in local communities, and

WHEREAS the people of Texas do not desire nor accept this European style of socialism for our State, nor do they wish to be imposed upon by non-elected bodies, extra-constitutional structures, & non-accountable boards and regional governing councils which insinuate their UN Agenda 21 on unsuspecting Governors, Mayors and city councils, deliberately by-passing our elected officials and legislative assemblies in order to remove our essential liberties and to fundamentally change our forms of republican justice until all private property rights have been encumbered and annulled, and

WHEREAS, according to the European model, privately held property is not viewed as an absolute right given by a benevolent Creator, but is viewed as a mere privilege granted by government with the clear understanding that every benefit so conferred carries with it a corresponding public social obligation which burden can never be severed or removed in order for liberty to be enjoyed by the owner or user, and

WHEREAS the Medieval concept of feudal "noblesse oblige", which has survived today under the modern form of European socialistic egalitarianism, essentially unchanged, still requires that all property ownership and use be civilly burdened by public obligations for the greater good of society, and

WHEREAS, by a deliberate and conscious act, in diametric opposition to that of the European doctrine and practice, the Americans conceived a new understanding of civil justice and political government, based on the notion of certain natural, God-given, and unalienable rights and liberties, granted to every individual in order that every man might be free to be self-governing under Nature and Nature's God, accountable to Him alone for his own life and liberty and property, as long as he did not violate the equal natural, God-given, and unalienable rights and liberties of all other citizens and his fellow inhabitants, for which purpose civil governments are instituted among men in order to secure those fundamental objects, and

WHEREAS, the people of the State of Texas subscribe entirely to the latter vision of freedom and property and self-government under Nature and Nature's God, and thoroughly reject the tyranny of globalism in the form of Agenda 21, Sustainable Development, and

WHEREAS the RPT stands for the full restoration of constitutional justice, individual liberty, and limited government, including the securing of our natural individual rights, liberties, and properties,

THEREFORE BE IT RESOLVED by the Republican Party of Texas through the whole body of the State Republican Executive Committee, that the people of Texas shall remain free (1) religiously, (2) socially, (3) economically, and (4) politically, according to our natural rights and liberties granted to us by God, and guaranteed to us constitutionally by our supreme political sovereign in acknowledgement thereto, in order that our fundamental rights and liberties shall be held inviolate forever, standing in opposition to all forms of religious, social, economic, and political globalism as set forth in the United Nations Agenda 21 Program together with all the implementing projects of Sustainable Development currently operating in this State or intending to be installed, funded, and operated in the future including the step by step abolition of private property; the setting aside of State lands for the international Wildlands Project; the irrational expansion of burdensome EPA regulations to inhibit our rational economic development; the systematic collectivization of human populations into high density housing settlements located in designated urban areas, under the restrictive policies of smart growth cities in order to depopulate the suburban neighborhoods and the rural areas to be declared unsustainable communities; the increasing activity of extra-constitutional bodies and non-elective governing councils, which operate regionally to plan and implement the 1992 UN Agenda 21 Program throughout our State, without being accountable to the people's will and pleasure; the educational mandates which seek to "re-educate" our children to become global citizens instead of self-governing free citizens of this State under our form of constitutional government; the comprehensive control of all our population and its reduction to sustainable levels and the socialization of all activities by their relocation to highly restricted urban settlement centers; the redefining of our current justice system from "equal justice" under law to "social justice" under very different laws of "distributive justice", where the common good is redefined to exclude all natural rights and liberties, in clear contravention of our current Constitution; the introduction of "public-private partnerships" to erase the essential distinction between free enterprise and public government for the unjust economic enrichment of the few; the reassignment of new values where plants and animals and even inanimate objects are given equal status or even greater rights than those now enjoyed by natural individuals and citizens; all designed to destroy our fundamental rights and liberties as a people, hitherto enjoyed under our system of just government, in order to transform us from men made in the image of God to men re-made in the image of compelled beings, oppressed, having no acknowledged rights or liberties held inviolate; all designed by the enemies of life, liberty, and the pursuit of happiness in order to reduce us to misery and bondage, without hope or God or natural moral absolutes.
